PLANNING AND PROVISION OF CARE SOLUTIONS

For people with mental health, learning disability complex needs and challenging behaviour

SUPPORT WITHIN THE COMMUNITY

Supported accommodation to individuals with the added benefit of floating care packages

Collaborative Care Solutions is a multi faceted organisation developed to provide a range of services that arise in the planning and provision of care for people who have enduring mental health and or learning difficulties.

Collaborative Care Solutions (CCS) strive to provide solutions to the variety of challenges that individuals may meet in their efforts to achieve recovery and stability in their lives.

The primary role and area of expertise of CCS is to provide supported accommodation to individuals with the added benefit of floating

care packages. These packages allow an individual to be treated or supported in a dwelling that they hold the tenancy too.

This service offers independent living and access to a range of benefits that are reduced or not available to people in care. It is developed around flexible support which is regularly evaluated and therefore able to change regardless of where a person is on their road to recovery.

KEY AREAS OF SUPPORT

- Supported Housing placements
- Vulnerable adults with mental health needs
- Recovery from substance and alcohol misuse
- Hospital discharges from psychiatric units, secure services and residential institutions
- Vulnerable adults with learning disabilities
- People with complex needs and challenging behaviours
- Intensive rehabilitation for all levels of need

HOUSING AND SUPPORT

Meeting the needs of people who use services whilst achieving the goals of reducing stigma and increasing social inclusion are the foundations of service provided by CCS.

CCS have acquired refurbished properties with HMO licences' for between 4 and 10 people. The accommodations are close to town centres, within easy reach of local amenities and public transport and have access to education and employment opportunities. Each home has off road parking, is furnished with high quality furniture and equipped with televisions, pay phone facilities and wireless internet connection.

CCS is a registered domiciliary care agency and has at board level registered mental health nurses who provide supervision and direction over the care packages that are delivered., this allows tenants of the home a degree of security in that should there presenting illness worsen then there are clinical structures that can identify relapse indicators and additional support can be accessed therefore reducing the likelihood of transfer back to an inpatient setting.

DOMICILIARY CARE SERVICES

- Individualised support packages to enable and empower people with learning disabilities and mental health needs
- Dedicated trained and experienced specialist support staff
- Support within the home and the community
- Personalised housing provision solutions
- Support in delivering and administering medication

We have established relationships with many social landlords who hold significant portfolios of property in and around London and the home counties. We are able to provide supported living accommodation with the added benefit of introducing flexible floating packages of support and care. This care provides purchasers with ongoing social and clinical updates about progress and presentation and provides residents with assistance in achieving new certificated skill sets and consolidation of existing skills through training and support.

Models of care based on clinical research are proven in reducing episodes of relapse and recall to inpatient settings. CCS deliver care to individuals who are intensively challenging through the CRTL, Community Rehabilitation and Transitional Living model that is supported by ECI, the Embedded Clinical Input Model. Further information is available by directly contacting our services.

If you feel our model of service would benefit you or somebody you support or provide care for, visit www.collaborativecare.org.uk for more information.
